## HOW TO TOW A EVOLUTION GOLF CART?

The following steps can help you to tow an EVOLUTION golf cart safely without any damage.

- Keep the Forward/Reverse switch in a neutral position. Turn off key switch.
- If you need to tow the golf cart for **long distance** ,remove the battery connections from battery pack terminals. This is done to ensure that the Rear axle /Motor/Controller/Batteries do not get damaged during the towing process.
- Move the golf cart at a **slower speed (Optimally Between 5-15MPH )or the same speed** that you would generally move it if it has power. Exceeding the speed limit can over-spin the motor and ruin it.
- Pulling your golf cart faster than designed to go can over-spin the motor. Possible slinging the internal parts into pieces and ruining the motor.
- Unlock the parking brakes . If you have a EM brake on your golf cart motor make sure to unlock it mechanically before towing the golf cart .

### WARNING

- DO NOT CARRY PASSENGERS ON GOLF CART WHILE TOWING THE VEHICLE.
- APPLY BRAKE TO LIMIT SPEED WHEN COMMIT SHARP TURNS.
- APPLY BRAKE TO LIMIT SPEED WHEN GO DOWN STEEP HILLS.
- APPLY BRAKE TO LIMIT SPEED WHEN TOW THE GOLF CART ON UNEVEN TERRAIN.
- TURN ON THE HAZARD LIGHTS IF VEHICLE WAS CONFIGURED WITH .
- TOW THE GOLF CART IN FORWARD DIRECTION .
- SECURE THE SEATS/WINDSHIELD/OTHER LOOSE ITEMS BEFORE TOWING THE GOLF CART.
- DO NOT TOW MULTIPLE GOLF CARTS IN SERIES FORMATION .
- DO NOT TOW THE GOLF CART ON HIGHWAY ROADS .
- ABORT TOWING WHEN ABNORMAL PHENOMENONS BEING DETECTED.

**PASSION . INNOVATION . RESPONSIBILITY**
